Introduction to QA - Coursework 01

Please note that this is a group coursework.
Groups:
https://docs.google.com/spreadsheets/d/1LZFHvqPBOiG5yMBjYdr8GYxVsAE5TO7h/edit?usp=sharing&ouid=109796549220959563432&rtpof=true&sd=true

Task 01

As a Quality Engineer, you are asked to verify the shopping cart functionality of the website http://automationpractice.com/index.php.Before starting the testing as a best practice we create test plans. The first task would be to come up with a test plan to test the shopping cart functionality. To get a better idea you can refer to the link below.

Below is a sample test plan:
https://www.guru99.com/what-everybody-ought-to-know-about-test-planing.htm

I **NOTE**: Please add test cases to the test plan document

Task 02
NOTE: Please use all the locator strategies (id, name, and XPath) if only one locator strategy is used throughout the script marks will be deducted

Write an automation script using Selenium (Java), TestNG and create a test plan for the below scenario.
NOTE: Before writing the script enter a test email address and create an account, then use those credentials to log in during the automation.

CREATE AN ACCOUNT

Please enter your email address to create an account.

Email address

Create an account

1. Go to http://automationpractice.com/index.php and use the previously created username/ password to log in to the system.
